0747.048.019

Our jobs involve developing, maintaining and integrating state of the art, mission critical solutions for core insurance and record keeping systems, in an international context for a leading European Insurance Group.

### Job brief

You will work in a multinational team focusing on Point-of-sales and customer service applications based on Pega, a low code development platform by Pegasystems.

Pega System Architect is an implementation role that covers a wide range of subject areas including user interface, data modelling, process implementation and integration.

### Main responsibilities

- Implementation of User Stories on the Pega platform from design through to unit testing
- Work in teams together with Business Analysts, Testers and Project Managers
- Involved in operating and maintaining the stability of our key applications (e.g. U.CRM)
- Work closely with our Platform team
- Bug fixing
- Documentation of completed solutions
- Packaging and Deployment of Releases.

### Required skills

- Open and highly motivated to learn new technologies and concepts (Pega PRPC)
- Knowledge of object-oriented programming, web technologies and relational databases
- Knowledge of APIs, especially SOAP/REST
- The ability to take a user story and analyse it into user interface, data and process components
- Ability to critically test your own implementation
- Fluency in English – both written and spoken
- University degree in Computer Science or similar.

### **Desirable skills** (nice to have)

- Java development experience
- DevOps experience
- German language skills
- Experience in business process management and case management implementations.

### **Compensation & benefits**

- Very stable work environment, as part of a large Insurance Multinational Group
- Flexible work program, respecting your own private time
- Full-time, unlimited employment contract
- Attractive remuneration package
- Lunch tickets
- Private pension and health insurance
- Extra vacation days
- Exchange of experience and training with international professionals, as a premise for personal development
- Career development opportunities
- German language courses
- Contribution to sport activities
- Team building events
- Great workplace, central office location in a green and quiet area, great city view etc.
